OBJECTIVE

Innovative and results-driven junior data analyst with a passion for turning complex data sets into actionable insights. Technical skills in Microsoft Excel, SQL, data modeling, and data visualization, with a keen eye for detail and a commitment to accuracy. Currently pursuing a Data Analytics Bootcamp program at Nashville Software School to expand knowledge and hone skills in analytics and business intelligence. Collaborative team player with excellent communication skills.

KEY SKILLS —

- Microsoft Excel (VLOOKUPs, Pivot Tables)
- pgAdmin
- SQL (PostgreSQL)
- Python
- Tableau
- Power BI
- Data modeling
- Data visualization
- Statistical analysis
- GitHub/Git Bash

EXPERIENCE

Nashville Software School, Data Analytics Bootcamp, (January 2023 –

June 2023)

- Hands-on training in spreadsheets, Python, and SQL skills required to do data analytics.
- Application of the analytics workflow to real-world problems drawn from a wide range of problem domains, such as: digital marketing, supply chain, healthcare, retail and financial services.
- Hands-on experience communicating findings via presentations and storytelling, building reports, and creating dashboards.

Lowes Pro Loader, Lowes Home Improvement, (April 2021 – August 2022)

- Loaded and unloaded trucks with building materials and equipment, ensuring items were properly secured and safely transported to the customer's vehicle.
 - Consistently exceeded customer satisfaction goals, receiving positive feedback from customers and management alike.
- Carpenter Apprentice, DPR Construction (January 2022 - April 2022)
- Completed carpentry program to gain foundational skills in construction and building trades
 - Demonstrated ability to work in a team, manage tasks and timelines, and attention to detail
